

THE PROBLEM

60,000 buses. Zero passenger intelligence.

India's ₹26,000 Cr private bus industry runs on conductors and missed calls.

Margin Bleed

OTAs (RedBus, AbhiBus) charge 8–15% commission. Operators have no way to win direct bookings back.

Communication Chaos

Passenger calls go to overwhelmed conductors. No 24/7 support. Missed bookings, unresolved complaints, zero passenger data.

The 20–200 bus mid-market operator has been **left behind** by GDS giants and **exploited** by OTAs. No one built for them.

SOLUTION

Meet **Pooja** — India's first AI voice agent for bus operators.

Handles every passenger call, 24/7, in Hindi and Hinglish.

Real-time tool calls · Multilingual STT + LLM + TTS · Google Vertex · Operator system integrated

MARKET OPPORTUNITY

A ₹26,000 Cr market with no AI player.

₹26,000 Cr

Total private intercity
bus market (India, 2025)

60,000

Private intercity buses
on the road today

₹1.04 Lakh Cr

Projected Indian stage carriage
bus industry by 2026 (CRISIL)

Growing at 7.2% CAGR. Top states: UP, Maharashtra, Rajasthan, Punjab, Haryana.

Our SAM — the 20–200 bus mid-market segment — represents thousands of operators and tens of thousands of buses, entirely unserved by AI.

WHY NOW

Three forces converging — right now.

AI is finally voice-ready

Multilingual STT/TTS in Hindi/Hinglish is now production-grade. This wasn't possible 2 years ago.

OTA squeeze is peaking

Commissions hitting 15%. Operators are actively looking for alternatives. Frustration is at an all-time high.

SaaS is hitting Tier 2/3

Mid-market bus operators are now open to software. Smartphone + UPI penetration has crossed the threshold.

The window to become the default AI infrastructure for private bus operators is open — and closing.

Per-bus, per-month SaaS. Sticky. Scalable.

Base Tier

Voice + Passenger Intelligence

₹2,000–3,000 / bus / month

Full Stack

Voice + CV + OBD + Yield Management

₹5,000–8,000 / bus / month

Example: A 50-bus operator = ₹1–4 lakh/month. Justified by leakage recovery, fuel savings, and direct booking revenue alone.

Recurring revenue. Low churn as data compounds with every call and trip.

TRACTION

Live. Paying. Growing.

Paying pilot operators live

North India, small/mid private operators

DPIIT-recognized startup

Government of India recognition

Bootstrapped to date

Founder takes no salary

Seed investor conversations

Active with strategic investors

We didn't build a demo. We built a product operators are paying for.

Everyone else is either too big, too narrow, or not AI.

	OTA Model	GDS Players	Call Centres	InstaBus
Target Segment	Travellers	500+ bus fleets	Large operators	20–200 bus operators
AI / Voice	No	No	Human only	AI-native, multilingual
Operator Value	Extracts margin	Only large fleets	Expensive, limited hrs	Direct bookings + data
Data Moat	Platform owns data	Minimal	None	Compounds every call

Our Moat

Every call = more passenger data = smarter routing, yield, and retention. Operators can't rip this out without losing 12 months of intelligence.

Built by people who've seen both sides — strategy and shipping.

Gautam Bahri

Founder & CEO

- ~9 years strategy consulting (manager level)
- MBA. Prior entrepreneurial experience.
- President, Delhi University Students' Union (DUSU)

Subham Agrawal

CTO

- Built the entire voice agent stack from scratch
- Leads a 3–4 member full-time tech team
- End-to-end: STT, LLM, TTS, integrations

One founder who knows how to sell and structure. One who ships. Together since day one.

THE ASK

Raising ₹3–4 Cr seed to go from pilot to scale.

40%

Engineering & Product

Expand call types, add CV + OBD modules

35%

GTM & Onboarding

Sales, partnerships, North India expansion

25%

Runway & Operations

18-month runway

Goal: 500+ buses live, 3-state coverage, ₹15–20L MRR within 12 months of raise.

This isn't a cost. It's a paycheck.

Before InstaBus

₹1.5–2L/month

on call centre staff + conductor coordination

20–30% booking leakage

Zero data on passengers

After InstaBus

₹1–1.5L/month

all-in SaaS cost

Leakage plugged. Direct bookings up.

Passenger intelligence compounding.

Operators recover the cost in month 1. Everything after is upside.

We're not selling software. We're selling margin back to operators who've been losing it for years.

In Their Own Words

“

Booking enquiries 40% badh gayi kyunki ab har call ka jawab milta hai — chahe raat ke 2 baje ho.
